Attachments: Draft Response to ORD-11-000-6811 (Methanol Institute)_ 05262011 daw.docx; Attachment to EPA response to ORD-11-000-6811 (Methanol Institute)_ 052611 daw.docx

Here are the revised controlled correspondence for Methanol.

Draft Response to
ORD-11-000-6811...

Attachment to EPA
response to ORD...

Elizabeth is moving this forward but we could incorporate necessary changes tomorrow.

Upon further discussion, the plan is to add a description of the two U. of Toronto studies and analysis of the data in an addendum to the current assessment draft. This addendum will be sent as an fyi to the agency and interagency reviewers simultaneously. The addendum will be announced in the upcoming FR notice (e.g. addendum will be posted to NCEA website - don't hold FR notice until addendum is complete) and posted to the NCEA website. The addendum should be text as we would add to the assessment.

let me know if you have questions,

-darrell

Subject: Methanol - next steps

I understand a decision has been made about the disposition in the Methanol Tox Review of the two Toronto studies.

We'll now add a description of the two Toronto studies and any additional text needed to put them into the methanol tox

review, and extract these pages for Vince and Norm to send out to Agency and Interagency reviewers. Vince/Norm will, in parallel, send them out and give AR and IAR a week to comment. After that, we'll make any revisions necessary, IAR comments will be placed on the IRIS page, and Vince will release a revised Tox Review for public comment. Whether this invokes a change to the public comment period and additional FR notice describing this change is unclear to me (I should think so).

The MeOH Control Correspondence will need to be revised. I'll contact Elizabeth now.

To be clear, I have very serious concerns about following this course of action and our ability to complete this assessment this year. Nonetheless, we'll move ahead expeditiously.

John
